Enron Scandal

About Enron

- Enron Corporation was an American energy, commodities and services company based in Texas. It was founded in 1985 by Kenneth Lay.
- Fortune named Enron “America’s Most Innovative Company” for six successive years.
- The Company declared itself bankrupt in October, 2001 after being publicized.
- Company’s stock price achieved a value of US dollar 90.75 per share in 2000 which plummeted to less than 1 dollar by the end of 2001.

Objective

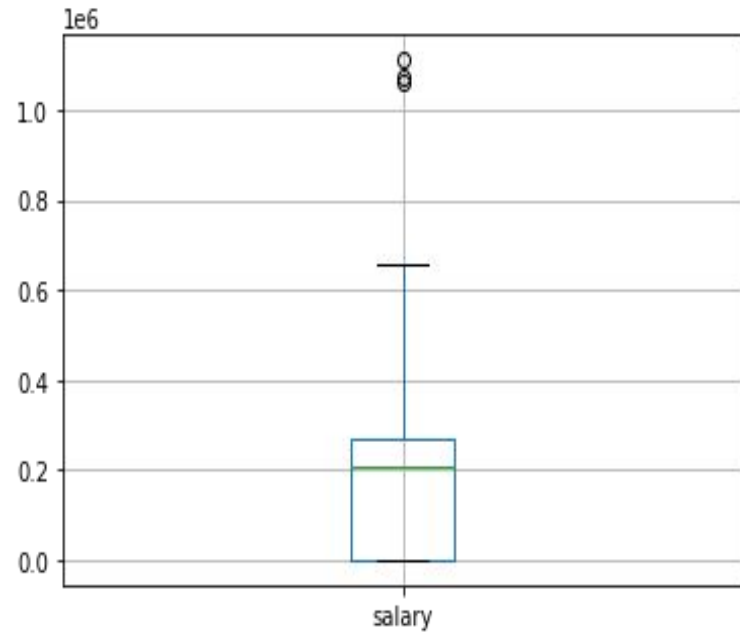

The Enron's emails and financial dataset contain the information which can help us predict the person of interest involved in Enron Scandal.

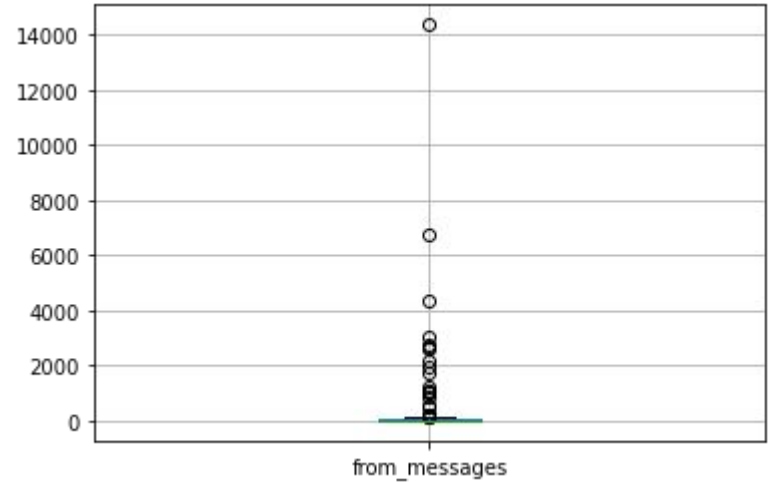

I will first do some EDA on the dataset and then Apply various ML models and finally compare their results.

Outliers:

- LAY KENNETH L
- SKILLING JEFFREY K
- FREVERT MARK A

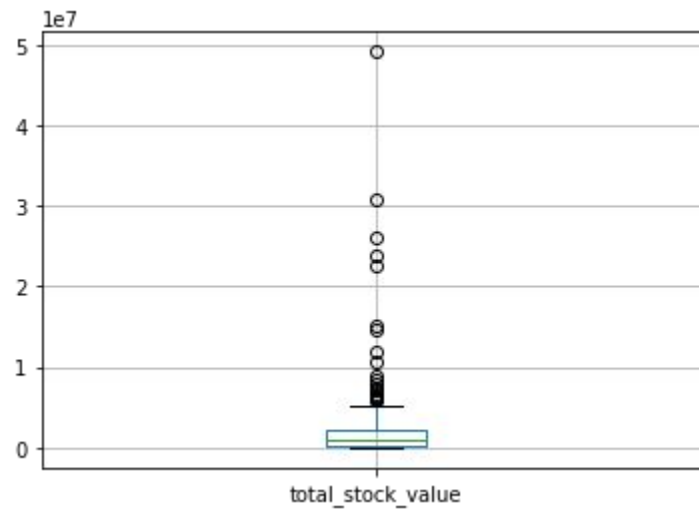

Highest mail sent and received by:

'BECK SALLY W', 'KAMINSKI WINCENTY J', 'KEAN STEVEN J', 'LAVORATO JOHN J'

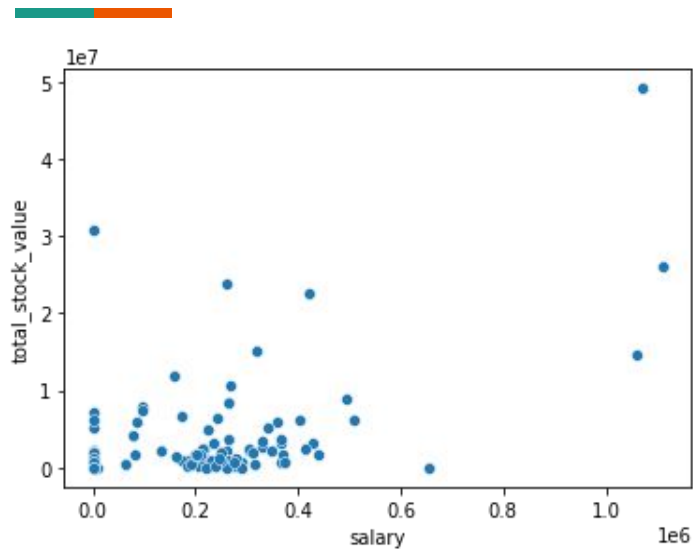

Outliers in bonus:

'KITCHEN LOUISE','LAVORATO JOHN J','BELDEN TIMOTHY N','ALLEN PHILLIP K'

Anomalies in stock values:

'LAY KENNETH L', 'HIRKO JOSEPH', 'SKILLING JEFFREY K', 'RICE KENNETH D'

Outliers in the above plots:

'LAY KENNETH L', 'RICE KENNETH D', 'SKILLING JEFFREY K', 'HIRKO JOSEPH', 'PAI LOU L'

POI in Enron Dataset

'LAVORATO JOHN J': more bonus than CEO , low salary

'LAY KENNETH L': Highest stock and extreme outlier in plots like salary and stock_values

'PAI LOU L' : less salary High stock_value

'RICE KENNETH D': less salary High stock_value

'KEAN STEVEN J': highest mail sent and received

'HIRKO JOSEPH': 2nd Highest stock, outlier in plot of salary vs stock_value

'SKILLING JEFFREY K': high bonus, 3rd highest stock

'BELDEN TIMOTHY N': 4th person with huge bonus and low salary

'ALLEN PHILLIP K': 5th person with huge bonus and low salary

ML Models

SVM using auto grid-search

Best Parameters are: {'C': 10, 'degree': 3, 'kernel': 'linear'}, best f1 : 0.3

Confusion Matrix

Finally

The best results are given by “Stochastic Gradient Boosting Classification Model” with Test accuracy of 90% and 68% AUC-ROC score.
